

Upgrade Your Parent Club Section to a “Full App”

Turn your club’s section into a powerful communication, planning, membership, and information hub.

What Does a “Full App” Mean?

- A customized Parent Club home screen similar to USAFA Information, Taste of Home, and Colorado.
- Organize club information into easy-to-find sections.
- Keep events, schedules, resources, links, documents, and updates in one place.
- Update your section anytime without families downloading another app.

Communicate Directly With Your Parents

- Send push notifications only to parents who follow your club.
- Quickly communicate schedule changes, reminders, updates, and important announcements.
- Send parents directly to the information they need inside the app.
- Reduce reliance on scattered emails, social media posts, and text chains.
- Use the In-App Chat feature to communicate with each other

Create Members-Only Information

- Create user groups specifically for paid or approved club members.
- Require members to login before seeing private club information.
- Share bus schedules, financials, volunteer instructions, meeting details, member resources, and more.
- Different groups can receive different information and notifications.

Use Forms to Manage Your Club

- Create membership forms for families to join your Parent Club.
- Collect contact information and membership details.
- Create volunteer sign-ups and event RSVPs.
- Create surveys, feedback forms, interest forms, and other club-specific forms.

Use the App for Club Planning & Operations

- Maintain an up-to-date club calendar and event schedule.
- Post meeting agendas, event instructions, maps, parking details, and timelines.
- Coordinate volunteers and recurring club activities.
- Create sections for Appointee Events, I-Day, Parents' Weekend, Tailgates, and more.
- Build a centralized resource that can be handed from one leadership team to the next.

One App. Your Club. Your Information.

- Families already have access to the USAFA Parents' Clubs app.
- Upgrading gives your club its own communication and planning hub inside the existing app.
- Keep parents informed, improve member engagement, and make club leadership easier.
- Make your club's section the first place parents go for club information.

There is a \$500/year charge to upgrade the app to help offset the cost for the app developer. This does not go to CPC, this goes to Armstrong Software for the app development. You could get a local business to be your app sponsor and put a Header Ad at the top of your clubs homepage.
